Mountain Weather Forecast

Ground Conditions Supplement

Date: Saturday 13 January. Location: Helvellyn summit at 12:24. Temperature: plus 0.5°C. Maximum wind speed 20.3mph. Wind chill: minus 7.3°C. Average wind speed: 15.4mph
. Full report: A cloudy and damp day with moderate winds over high ground. The temperature on top of Helvellyn was just above freezing and any remaining snow and ice was slowly thawing.
The Lakeland fells are by and large snow-free, however, there is snow and ice present on the highest tops. Above 800m, the ground is partially frozen with rime ice and a very thin cover of snow. Small patches of old, compacted, and icy snow are also present on and around Helvellyn, notably on the exits to both Striding and Swirral edges. An ice axe and crampons/microspikes are advisable for these and similar steep and exposed routes in the area.Full winter clothing (waterproofs, extra warm layers, hat & gloves), and equipment including a headtorch, map, and compass are all essential.

.
